Apocalyptic Visions in 21st Century Films Elizabeth A. Ford 2018-06-18 The apocalypse on the big screen has expanded beyond the familiar end-of-the-world movies. Romantic comedies, teen adventures and even children's films frequently feature apocalyptic imagery—disintegrating cities, extreme weather events, extinctions, rogue military forces, epidemics, zombie armies and worlds colliding.

Using sophisticated CGI effects, filmmakers are depicting the end of the world ever more stunningly. The authors explore the phenomenon of the cinematic apocalypse and its origins in both our anxieties and our real-world events, and they identify some flashes of hope in the desolate landscape.

Online Arbitration in Theory and in Practice
Ihab Abdel Salam Amro 2019-01-08 This book presents an overview of online arbitration and electronic contracting worldwide, examining their national and international contexts, and assessing their ongoing relevance. It offers solutions to the salient challenges facing both online arbitration and electronic contracting, dealing first–hand with online arbitration as an online dispute resolution technique for solving both traditional and electronic commerce disputes that may arise out of the breach of contractual obligations in international commercial contracts, while also comparing between common law and civil law countries. In the theory of law, this book analyses the international legal framework that regulates e–commerce, and its impact on electronic contracting, including Model Laws and International Conventions such as the Model Law on Electronic Commerce of 1996 and the Electronic Communications Convention of 2005. It also investigates whether the UN Convention on Contracts for the International Sale of Goods of 1980 'The CISG' applies to e–commerce contracts. In addition, it extensively examines the possibility for the enforcement of online arbitration agreements and online arbitral awards under the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards of 1958. Regarding the practice of law, the volume examines how national courts apply both national laws and the New York Convention of 1958 when dealing with the enforcement of online arbitration agreements, and whether courts apply the provisions of national laws of

arbitration liberally. As such, it encourages the adoption of a more liberal judicial regime in favour of the enforcement of online arbitral awards and online arbitration agreements in national courts. This book represents a valuable resource for academics, arbitrators, practicing lawyers, corporate counsels, law students, researchers, and professionals who are willing to solve their cross–border commercial disputes through online arbitration.

The Routledge Research Companion to Planning and Culture Dr Greg Young 2013-09-28 It has become increasingly evident that effective planning for sustainable communities, environments and economies pivots on the ability of planners to see the possibilities for culture in comprehensive social, historical and environmental terms and to more fully engage with the cultural practices, processes and theorisation that comprise a social formation. More broadly, an approach to planning theory and practice that is itself formed through a close engagement with culture is required. This Research Companion brings together leading experts from around the world to map the contours of the relationship between planning and culture and to present these inextricably linked concepts and issues together in one place. By examining significant trends in varying national and international contexts, the contributors scrutinise the theories and practices of both planning and culture and explore not only their interface, but significant divergences and tensions. In doing so, this collection provides the first comprehensive overview and analysis of planning and culture, interdisciplinary and international in scope. It is comprised of six parts organised around the themes of global and historical contexts, key dimensions of planning and cultural theory and practice, and cultural and planning dynamics. Each section includes a final chapter that provides a case study lens which pulls the themes of the section together with reference to a significant planning issue or

initiative.

Multilateralism in the 21st Century Caroline Bouchard 2013-08-15 This volume focuses on multilateralism in the 21st century and examines how, and how effectively, the EU delivers on its commitment to effective multilateralism. Presenting results generated by MERCURY, an EU research programme into multilateralism, this book addresses a central research question: does the EU deliver on its commitment to effective multilateralism? Globalisation has created powerful new incentives for states to cooperate and has generated renewed interest in multilateralism. While a large body of work exists on multilateralism as a concept, it continues to be ill-defined and poorly understood. This book sheds new light on 21st century multilateralism by exploring conceptual approaches as well as generating innovative, empirical knowledge on its practice. Research on EU external relations has increasingly focused on the concept of 'effective multilateralism'. Yet, the application of this concept as a guiding principle of EU foreign policy in non-security policy areas has rarely been examined. This book explores whether the EU is pursuing effective multilateralism in specific policy areas, including trade, climate change and conflict resolution, and distinct geographical and institutional settings, both internal to the EU and in specified regions, international organisations (IOs) and bilateral partnerships. This book offers evidence-based, actionable policy lessons from Europe's experience in promoting multilateralism. The European Union and Multilateralism in the 21st Century will be of interest to students and scholars of international

relations, international organizations, and European Union politics and foreign policy. Health Informatics: Practical Guide Seventh Edition William R. Finance and Society in 21st Century China Junie T. Tong 2016-04-15 In this revealing book Junie Tong reflects on the role of banking and finance in China. The author adopts a critical perspective that views the societal as well as economic functioning of banking and finance. Finance and Society in 21st Century China considers how far the modern economy is disconnected from Chinese culture and history and the problems this separation may cause. She questions the common assumption that China has outgrown its reliance on its Western counterparts. The author believes that the country is still very much dependent on exports and foreign investments and any radical or rapid reduction in either would have serious adverse consequences for China's sustainable economic growth. To provide a model for 'finance and society' that integrates culture and economy, Tong draws on the seminal work of Belgian economist, banker and social commentator, Bernard Lietaer, who has focused on cultural forces and the future of money in the world, generally. Using representative case studies for illustration, Tong applies Lietaer's work in a specifically Chinese context, highlighting the need to root finance and enterprise in the rhythms and forces within Chinese culture to avoid future chaos and achieve socio-economic stability in a country now so critical to global well-being.

Keeping National Parks Relevant in the 21st Century 2005

The Smallpox Vaccination Program Institute of Medicine 2005-09-06 December 13, 2002, the president of the United States announced that smallpox vaccination would be offered to some categories of civilians and administered to members of the military and government representatives in high-risk areas of the world.

The events that precipitated that historic announcement included a series of terrorist attacks during the 1990s, which culminated in the catastrophic events of 2001. Although preparedness for deliberate attacks with biologic weapons was already the subject of much public health planning, meetings, and publications as the twentieth century neared its end, the events of 2001 led to a steep rise in bioterrorism-related government policies and funding, and in state and local preparedness activities, for example, in public health, health care, and the emergency response and public safety communities. The national smallpox vaccination program is but one of many efforts to improve readiness to respond to deliberate releases of biologic agents. The Institute of Medicine (IOM) Committee on Smallpox Vaccination Program Implementation was convened in October 2002 at the request of the Centers for Disease Control and Prevention (CDC), the federal agency charged with implementing the government's policy of providing smallpox vaccine first to public health and health care workers on response teams, then to all interested health care workers and other first responders, and finally to members of the general public who might insist on receiving the vaccine. The committee was charged with providing "advice to the CDC and the program investigators on selected aspects of the smallpox program implementation and evaluation." The committee met six times over 19 months and wrote a series of brief "letter" reports. The Smallpox Vaccination Program: Public Health in an Age of Terrorism constitutes the committee's seventh and final report, and the committee hopes that it will fulfill three purposes: 1) To serve as an archival document that brings together the six reports addressed to Julie Gerberding, director of CDC, and previously released on line and as short, unbound papers; 2) To serve as a historical document that summarizes milestones in the smallpox vaccination program, and ; 3) To comment on the

achievement of overall goals of the smallpox vaccination program (in accordance with the last item in the charge), including lessons learned from the program.

The Global Journalist in the 21st Century David H. Weaver 2012-06-25 The Global Journalist in the 21st Century systematically assesses the demographics, education, socialization, professional attitudes and working conditions of journalists in various countries around the world. This book updates the original Global Journalist (1998) volume with new data, adding more than a dozen countries, and provides material on comparative research about journalists that will be useful to those interested in doing their own studies. The editors put together this collection working under the assumption that journalists' backgrounds,

working conditions and ideas are related to what is reported (and how it is covered) in the various news media round the world, in spite of societal and organizational constraints, and that this news coverage matters in terms of world public opinion and policies. Outstanding features include: Coverage of 33 nations located around the globe, based on recent surveys conducted among representative samples of local journalists Comprehensive analyses by well-known media scholars from each country A section on comparative studies of journalists An appendix with a collection of survey questions used in various nations to question journalists As the most comprehensive and reliable source on journalists around the world, The Global Journalist will serve as the primary source for evaluating the state of journalism. As such, it promises to become a standard reference among journalism, media, and communication students and researchers around the world.
