**Emotion, Place and Culture** Mick Smith 2016-05-06 Recent years have witnessed a rapid rise in engagement with emotion and affect across a broad range of disciplines in the humanities and social sciences, with geographers among others making a significant contribution by examining the emotional intersections between people and places. Building on the achievements of *Emotional Geographies* (2005), the editors have brought together leading scholars such as Nigel Thrift, Alphonso Lingis and Frances Dyson as well as young, up and coming academics from a diverse range of disciplines to investigate feelings and affect in various spatial and social contexts, environments and landscapes. The book is divided into five sections covering the themes of remembering, understanding, mourning, belonging, and enchanting.

**Heritage Regimes and the State** Bendix, Regina 2013-07-02 What happens when UNESCO heritage conventions are ratified by a state? How do UNESCO's global efforts interact with preexisting local, regional and state efforts to conserve or promote culture? What new institutions emerge to address the mandate? The contributors to this volume focus on the work of translation and interpretation that ensues once heritage conventions are ratified and implemented. With seventeen case studies from Europe, Africa, the Caribbean and China, the volume provides comparative evidence for the divergent heritage regimes generated in states that differ in history and political organization. The cases illustrate how UNESCO's

aspiration to honor and celebrate cultural diversity diversifies itself. The very effort to adopt a global heritage regime forces myriad adaptations to particular state and interstate modalities of building and managing heritage.

*Culture and Computing* Toru Ishida 2010-11-18 In the light of upcoming global issues, concerning population, energy, the environment, and food, information and communication technologies are required to overcome difficulties in communication among cultures. In this context, the First International Conference on Culture and Computing, which was held in Kyoto, Japan, in February 2010, was conceived as a collection of symposia, panels, workshops, exhibitions, and guided tours intended to share issues, activities, and research results regarding culture and computing. This volume includes 17 invited and selected papers dealing with state-of-the-art topics in culturally situated agents, intercultural collaboration and support systems, culture and computing for art and heritage, as well as culture and computing within regional communities.

The Cambridge Handbook of Material Culture Studies Lu Ann De Cunzo 2022-06-09 Material culture studies is an interdisciplinary field that examines the relationships between people and their things: the production, history, preservation, and interpretation of objects. It draws on theory and practice from disciplines in the social sciences and humanities, such as anthropology, archaeology, history, and museum studies. Written by leading international scholars, this Handbook provides a comprehensive view of developments, methodologies and theories. It is divided into five broad themes, embracing both classic and emerging areas of research in the field. Chapters outline transformative moments in material culture scholarship, and present research from around the world, focusing on multiple material and digital media that show the scope and breadth of this exciting field. Written in an easy-to-read style, it is essential reading for students, researchers and professionals with an interest in material culture.

The History and Cultural Heritage of Chinese Calligraphy, Printing and Library Work Susan Macall Allen 2010 In China the tradition of a book society is longer than anywhere else in the world. Chinese paper making, calligraphy and woodblock printing date from very early ages, but have for a very long time remained almost unknown to the Western world. At the IFLA satellite meeting Chinese Written and Printed Cultural Heritage and Library Work in Hangzhou in 2006 the richness of present day book historical research and library activities in China has been presented by more than sixty papers. This fine selection reflects the width and depth of this extremely important and immense Chinese heritage."

**Multilingual and Multimodal Information Access Evaluation** Maristella Agosti 2010-09-10 In its first ten years of activities (2000-2009), the Cross-Language Evaluation Forum (CLEF) played a leading role in stimulating investigation and research in a wide range of key areas in the information retrieval domain, such as cross-language question answering, image and geographic information retrieval, interactive retrieval, and many more. It also promoted the study and implementation of appropriate evaluation methodologies for these diverse types of tasks and - dia. As a result, CLEF has been extremely successful in building a wide, strong, and multidisciplinary research community, which covers and spans the different areas of expertise needed to deal with the spread of CLEF tracks and tasks. This constantly growing and almost completely voluntary community has dedicated an incredible amount of effort to making CLEF happen and is at the core of the CLEF achievements. CLEF 2010 represented a radical innovation of the "classic CLEF"

format and an experiment aimed at understanding how “next generation” evaluation campaigns might be structured. We had to face the problem of how to innovate CLEF while still preserving its traditional core business, namely the benchmarking activities carried out in the various tracks and tasks. The consensus, after lively and community-wide discussions, was to make CLEF an independent four-day event, no longer organized in conjunction with the European Conference on Research and Advanced Technology for Digital Libraries (ECDL) where CLEF has been running as a two-and-a-half-day workshop. CLEF 2010 thus consisted of two main parts: a peer-reviewed conference – the first two days – and a series of laboratories and workshops – the second two days.
